What we'll cover:

- Interaction of design and disability
- Introduction to digital accessibility
- Strategies for creating accessible materials
  - Documents
  - Slide Decks
  - Videos

### Which is "good design"?

Partners

9

---

---

---

---

---

---

---

---

Design has the power to make us feel competent or incompetent; it has the power to include us or exclude us.

Elaine Ostroff  
Founding Director  
Institute for Human-Centered Design

Partners

10

---

---

---

---

---

---

---

---

### Universal Design as a Philosophical Framework

The philosophy challenges us to think in new ways – to anticipate the variety of settings and conditions in which people perform a task or use an object...

... and then to design the process, course, or object with those diverse possibilities in mind.

Partners

11

---

---

---

---

---

---

---

---

### What is Digital Accessibility?

- Digital accessibility involves the creation of websites, mobile applications and electronic documents that can be easily navigated and understood by a wide range of users.

---

---

---

---

---

**P.O.U.R.**

- Perceivable
- Operable
- Understandable
- Robust

Web Access Professionals  
**P.O.U.R.**  
 their hearts out.  
  
 A11Y Matters

Partners

13

---

---

---

---

---

---

---

---

**Perceivable and Understandable**

- Visual components are accessible.
- Audio components are accessible.
- Information is as intuitive and clearly written as possible.
- Those who use assistive technology can assess content.

Partners

14

---

---

---

---

---

---

---

---

**Document Accessibility**

Partners

15

---

---

---

---

---

---

---

---

## Using Headings to Provide Structure

- Headings provide structure to your document.
- Using normal text and applying styles such as larger size, different color, or bolder text does not create a true heading.
- Don't use headings when you don't need a true heading.

Partners

16

---

---

---

---

---

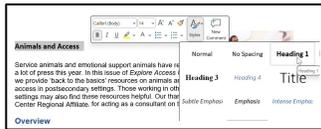

---

---

---

## How to Add Headings

- Highlight the text
- Click on the appropriate heading
- Or use keyboard shortcuts
  - PC: Control+Alt+1
  - Mac: Command+Option+1

Partners

17

---

---

---

---

---

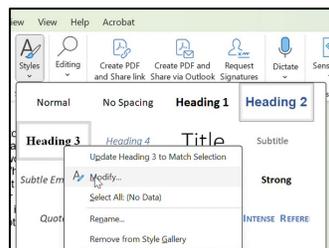

---

---

---

## Modify Headings

- Modify a heading by:
  - Right clicking on the heading in the styles group and choosing modify OR
  - Change the heading in your document and choosing Update Heading to Match Selection

Partners

18

---

---

---

---

---

---

---

---

### Alternative Text:

**a text description of an image**

(or other non-text content)

Also called:

alt text, image description

Partners

19

---

---

---

---

---

---

---

---

### Why Use Alt Text

- Without alt text, a screen reader user will not know what an image is.
- Images often convey important information.
- The screen reader will just say "graphic"

Partners

20

---

---

---

---

---

---

---

---

### Sample Alt Text

A Pomeranian wearing glasses looks down at an open book.

Partners

21

---

---

---

---

---

---

---

---

### How to Add Alt Text (1)

- Right click on the image
- Choose View Alt Text

22

---

---

---

---

---

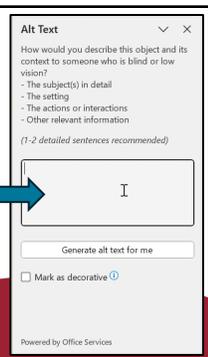

---

---

---

### How to Add Alt Text (2)

- Write the description in the box that appears to the right of the document.
- Describe what is in the image.
- No need to say "image of" or "picture of"

23

---

---

---

---

---

---

---

---

### Writing Alt Text

- A bird is perched on a branch. It has white and black striping on its face, a bright red crest, a long black beak, and black body and wings.
- Caption: Male pileated woodpecker

24

---

---

---

---

---

---

---

---

### More Complex Images

- For charts and graphs, make sure to select the outside edge when adding alt text
- Option 1: Place full description in alt text
- Option 2: Include brief description and summarize the rest of the data in the slide content

Partners

25

---

---

---

---

---

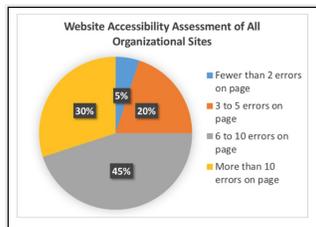

---

---

---

### Chart Sample

- 45% have 6 to 10 errors on page
- 30% have more than 10 errors on page
- 20% have 3 to 5 errors on page
- 5% have fewer than 2 errors on page.

Alt text:  
Pie chart title: Website Accessibility Assessment of All Organizational Sites. Data summarized on slide.

26

---

---

---

---

---

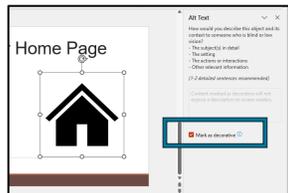

---

---

---

### Purely Decorative Image

- Images that do not add anything to the content
- Images that are redundant to the content
- Images that are visual separators

Partners

27

---

---

---

---

---

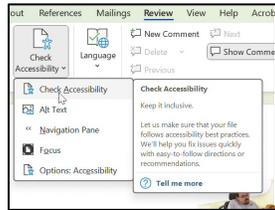

---

---

---

### Using the Accessibility Checker (1 of 2)

- Select Review Ribbon
- Select Accessibility Checker

Partners

28

---

---

---

---

---

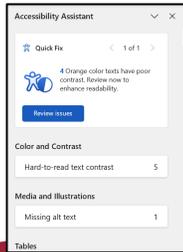

---

---

---

### Using the Accessibility Checker (2 of 2)

- Panel opens to the right
- Identifies accessibility issues

Partners

29

---

---

---

---

---

---

---

---

### Save as PDF

- Always "Save As" PDF instead of Printing to PDF
  - Newer versions: Save a Copy and then choose PDF from dropdown menu
- If using a Mac, also choose "Best for electronic distribution and accessibility"

Partners

30

---

---

---

---

---

---

---

---

**Slide Decks**

31

---

---

---

---

---

---

---

---

**Common Barriers in Slide Decks**

- Poor contrast
- Too much text on a slide
- Images with no alt text
- Duplicate headings

32

---

---

---

---

---

---

---

---

**Providing Good Contrast**

- Select a slide design with good contrast between text and background.
  - Black or dark blue text on a light grey or white background
  - Light text—white or light grey—on black or dark blue background
- If you are unsure about the contrast, check it with a contrast analyzer

33

---

---

---

---

---

---

---

---

### Choosing Design Templates

Partners

34

---

---

---

---

---

---

---

---

### Checking Color Contrast 1

<b>Foreground Color</b> #9ECF28 Lightness	<b>Background Color</b> #284D79 Lightness	<b>Contrast Ratio</b> <b>4.67:1</b> <a href="#">permalink</a>
<b>Normal Text</b> WCAG AA: <b>Pass</b> WCAG AAA: <b>Fail</b>		
The five boxing wizards jump quickly.		
<b>Large Text</b> WCAG AA: <b>Pass</b> WCAG AAA: <b>Pass</b>		
The five boxing wizards jump quickly.		

Partners

35

---

---

---

---

---

---

---

---

### Checking Color Contrast 2

<b>Foreground Color</b> #9ECF28 Lightness	<b>Background Color</b> #287494 Lightness	<b>Contrast Ratio</b> <b>2.84:1</b> <a href="#">permalink</a>
<b>Normal Text</b> WCAG AA: <b>Fail</b> WCAG AAA: <b>Fail</b>		
The five boxing wizards jump quickly.		
<b>Large Text</b> WCAG AA: <b>Fail</b> WCAG AAA: <b>Fail</b>		
The five boxing wizards jump quickly.		

Partners

36

---

---

---

---

---

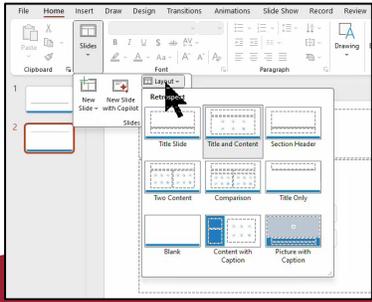

---

---

---

### Choosing Slide Layouts

- Do not choose the blank slide and then add text boxes.
- Choose the layout that fits your content best.
- This allows all of the text content to be available in the Outline View for easier exporting.

---

---

---

---

---

---

---

---

37

### Using Unique Headings for Each Slide

- Make sure each slide has a unique heading.
- If you have information that continues across more than one slide add "continued" if there are 2 or number them if there are more than 2.
  - Data from Our Study - 1
  - Data from Our Study - 2
  - Data from Our Study - 3

Partners

---

---

---

---

---

---

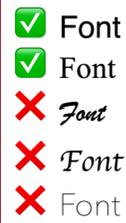

---

---

38

### Choosing Fonts and Font Size

- Choose fonts that are clear and easy to read
  - Sans Serif or Times New Roman
  - Avoid very decorative or thin fonts
- Avoid putting too much text on slide and making fonts too small
  - 28+ for in person presentations
  - 24+ for webinars

Partners

---

---

---

---

---

---

---

---

39

## Captions

- Automation can help you create captions.
- Captions always need to be checked/edited.
- Captions should have punctuation
- Captions should provide information about what is happening auditorily in addition to spoken words.
- Automation has its place and its limits.
